

Professional Profile

'Versatile and detailed-oriented young professional with a degree in pure mathematics having passion and certified in front-end software development, a mobile application development enthusiast with ability to learn on the job.'

Methodical, client-focused front-end software developer, with over three years of training in responsive web development. Adept at developing user interfaces, and ability in optimizing codes. Recognized for developing bespoke responsive interfaces that optimize business performance and generate positive customer reviews. Enjoys collaborating with colleagues to provide a greater platform for the success of projects. I look forward to using my skill to enhance the company's participation in the e-community.

Core Skills

- Web Application Front-End

- HTML5, CSS3, SASS, Bootstrap, jQuery
- Git Version Control
- Firebase
- VS Code, Window

Experience

Front-end Software Developer Intern - Zyonel Technologies, Lagos, Nigeria

Aug 2021 – Present

Joined Zyonel Technologies to create high-quality, user-friendly responsive applications that met customer satisfaction.

Responsible for translating figma designs to real applications for the company's clients.

- Collaborated with the web designers and developers to build applications that are used for commercial, educational and entertainment purposes.
- Successfully developed from scratch a super admin for a Fin-Tech application, an Ed-Tech, and a music streaming application using React.js, Redux and other tools.
- Ensured that the applications were responsive for mobile, tablet and desktop.
- Created reusable components that are robust and easy to maintain.
- Learned a lot of new techniques in using the JavaScript library.

Some of my Projects

Home Ecommerce Application

[Link to source code](#), [View live](#)

This application displays furniture products for sale and also shows different home decoration for interior design services to client, and lastly is displays homes for sale. It's all about everything home. I forgot to mention that it was inspired by a fellow developer.

- Successfully developed the application front-end from scratch using ReactJs.
- Currently developing the API using NodeJs, MongoDB, and integrating a payment system.
- The front-end would be deployed to netlify, while the backend would be deployed to Heroku.
- Tools used: React, Redux, and other tools.

Personal Portfolio

[Link to source code](#), [View live](#)

- Designed and developed a responsive personal portfolio with animations from scratch in React.
- Displays my recent projects and work experience.
- Tools used: React, MDBootstrap, Bootstrap, Sass and other tools.

Expense Tracker Application

[Link to source code](#), [View live](#)

- Successfully developed an expense tracker application from scratch in React.
- Tools used: React, and other tools.

UBA Clone

[Link to source code](#), [View live](#)

- Created five responsive pages of UBA website.
- Tools used: HTML5, CSS3, Javascript, Bootstrap
